

Authorized Distributor

INNOVATIVE FUEL STORAGE TANKS

Specialize in Fuel Storage Tanks and digitalization.
We are leaders in tanks monitoring and technology
integration for supply control.

Manufacturing of **TANKS**

Double-**Walled** **Ultra-**resistant Diesel & Gasoline tanks

Our double-walled tanks for diesel and gasoline are designed with state-of-the-art technology to ensure maximum safety and durability. These tanks are ideal for fuel storage in a variety of settings, including industrial facilities, service stations, and agricultural operations.

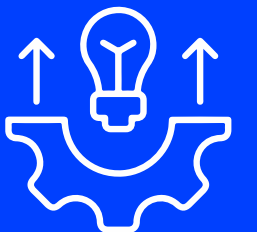

Take CONTROL

IoT monitoring

For fuel tanks: Control
and simplicity

The digitization of diesel and gasoline tanks is crucial for improving efficiency and safety in fuel management. With IoT technology, fuel levels, tank locations, and supply histories can be monitored in real time. This allows for optimized replenishment, reduced risk of theft and losses, and facilitates informed decision-making, significantly enhancing operations and resource management

Our **MODELS**

Our **Double-Walled Steel Tanks: Ultra-Resistant and Secure**

Ultra-resistant double-walled steel tanks provide maximum safety and durability for efficient and secure fuel storage and management.

NW-1000 / 265G

Our 1000-liter (265-gallon) tanks provide safe, efficient fuel storage with maximum durability and resistance, ideal for effective fuel management.

NW-2000 / 530G

Our 2000-liter (530-gallon) tanks ensure secure, efficient fuel storage, combining high durability with robust construction for optimal fuel management.

NW-4000 / 1000G

Our 4000-liter tanks offer superior durability and safety for large-scale fuel storage, ensuring efficient and reliable fuel management.

Product Solution

Complete diesel and gasoline tank solution with digitalization for real-time monitoring of fuel levels and location, ensuring efficiency and safety.

Durability and reliability

Our tanks offer unmatched durability and reliability, ensuring safe and long-lasting fuel storage.

Integrated location tracking

Our tanks feature integrated GPS for precise and reliable location tracking at all times.

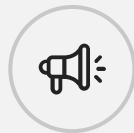

Achieve savings

Achieve significant savings with telemetry by optimizing diesel and gasoline tank management efficiently.

Precision and control

Our telemetry systems provide exceptional control and precision for accurate fuel level monitoring.

Share the information

Share tank data with anyone you choose for seamless and efficient fuel management.

Custom-made

Custom tank and telemetry services tailored to your needs for optimal fuel management solutions.

The NW series tank offers a **flexible solution** for the storage of combustible liquids (diesel, gasoline, oil, coolant, etc.), as well as for **improving fuel dispensing** and management solutions. Its practical and stationary design ensures quick, easy, and convenient installation in any location, both **indoors and outdoors**.

With its **fully transportable** design and the ability to supply multiple pieces of equipment simultaneously, the **installation process is versatile and fast**. The standalone "cube" shape allows for 360° viewing and inspection. **The high-quality powder** coating paint ensures greater durability against the elements. The durable stationary design with containment provides enhanced **safety and protection**.
